Introduction

The Equality Act 2010 requires that schools promote equality for disabled students and staff. The Academy is committed to improving access for disabled students in order to prevent discrimination.

The Academy is an inclusive school and is proactive in thinking ahead to anticipate the barriers that disabled students may face and takes active steps to minimise them so that the student is fully included in all aspects of school life.

The Governing Board of the school is responsible for the implementation of the plan. They will ensure, through the Headteacher and Senior Leadership Team, that all staff are aware of how these duties should be implemented in their specific areas of responsibility.

If a parent/guardian thinks that their child has been discriminated against, they have a right of redress by making a claim of disability discrimination to the SEN and Disability Tribunal (SENDIST). If the tribunal finds that a school has discriminated unlawfully against a disabled student it can order any remedy that it sees fit, except financial compensation.

Definition of Disability

A person has a disability if he or she has a physical or mental impairment that has a substantial and long-term negative effect on his or her ability to carry out normal day to day activities.

- A physical or mental impairment includes sensory impairments, impairments relating to mental functioning including learning disabilities, long term health conditions such as diabetes, epilepsy, HIV, cancer or multiple sclerosis
- Long term means an impairment that has lasted at least 12 months or is expected to last at least 12 months

Aims

The plan will:

- be embedded in a culture of high expectations for all
- be guided by the Inclusion and Special Educational Needs and Disability Policy into Practice document
- respond to the views of students and parents/guardians
- demonstrate a commitment to developing access to the school for all students
- show commitment to the effective and sustainable use of resources
- be clear about how it will be evaluated.

Monitoring and Evaluating

The implementation of the plan is the responsibility of the Headteacher and Governing Board. It will be reviewed annually and revised every three years. In the process of its review it will take into consideration the views of disabled students, their parents/guardians and care providers in the community.

1. Adequately resourced
2. Implemented
3. Reviewed annually
4. Revised as necessary
5. Renewed every three years
6. Available to parent/guardian

Improving Access for Disabled Students

This plan addressed the three strands of the statutory requirements:

Increasing the extent to which disabled students can participate in the curriculum. This covers teaching and learning and the wider curriculum of the school such as participation in after school clubs, leisure and cultural activities or school visits. Staff are expected to work alongside the inclusion team in identifying barriers and minimising barriers, as far as possible, which may reduce access to the curriculum for some pupils. All pupils, regardless of their disability, should be set challenging targets which are regularly monitored and up-dated.

Improving the physical environment of schools to enable those with disabilities to take better advantage of education, benefits, facilities and services provided. This covers improvements to the physical environment of the school and physical aids to access education.

Improving the availability of accessible information to those with disabilities. This will include planning to make written information that is normally provided by the school to its students available to disabled students. Examples might include handouts, timetables, textbooks and information about school events. The information should take account of students' disabilities and students' and parents' preferred formats and be made available within a reasonable time frame.

Procedure

To identify barriers to access by disabled students a needs analysis checklist has been completed – Annex 1.

From the findings of this checklist an Action Plan has been written to identify necessary action to make the adjustments necessary – Annex 2.

This action plan will form part of the whole school development plan agenda. Progress will be reviewed annually and this accessibility plan adjusted accordingly.
